90024

Los Angeles, CA, 90024

Sr Software Engineer (Remote Position)

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: $120000.00 to $160000.00 yearly
Employment status: Permanent

Description

Senior Software Engineer (Django/Python)

Location: Fully Remote (Must work standard hours in Pacific Time Zone)

Salary Range: $120K - $160K+ (negotiable for exceptional talent)

Benefits: Comprehensive benefits package available

We are looking for an experienced **Senior Software Engineer** to join our innovative team in the digital advertising and data marketing space. This role involves a mix of maintaining existing platforms and contributing to the development of new proprietary technologies designed to transform the way campaigns are built and traffic is monetized.

What You'll Do:

- Design, develop, and maintain scalable software solutions for digital advertising platforms.
- Collaborate with cross-functional teams, including data scientists and product managers, to define and implement new features.
- Develop and integrate APIs and third-party services.
- Optimize and refactor code to improve system performance and reliability.
- Implement DevOps practices and tools, including CI/CD pipelines and version control.
- Mentor junior developers and contribute to process improvements within the development team.
- Stay updated on industry trends and emerging technologies to ensure our platforms remain cutting-edge.

If you're passionate about cutting-edge technology and want to make an impact in the digital advertising industry, we'd love to hear from you!

For immediate consideration, direct message Reid Gormly on LinkedIn and Apply Now!

Requirements

What You Bring:

Must-Haves:

- 7+ years of software development experience, focusing on backend development.
- Expertise in **Python** and **Django**, with a proven track record of building and maintaining scalable applications.
- Strong understanding of cloud computing platforms (e.g., AWS, Google Cloud, Azure).
- Proficiency in database technologies such as MySQL, PostgreSQL, MongoDB, or Redis.
- Familiarity with DevOps tools and practices, including CI/CD pipelines and GitHub.
- Solid understanding of data structures, algorithms, and software design principles.
- Excellent communication and collaboration skills, with the ability to thrive in a team environment.

Nice-to-Haves:

- Experience in the AdTech industry or digital marketing space.
- Familiarity with big data technologies like Snowflake or Redshift.
- Knowledge of front-end technologies, such as JavaScript or Vue.js.
- Exposure to machine learning and AI technologies.
