Software Developer

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay. **Salary range:** \$71.25 to \$82.50 hourly **Employment status:** Temporary

Description

A Robert Half Technology client has an employment opportunity for a Software Developer. The ideal candidate for this position will effectively be responsible for implementing new features, maintaining existing code, and refactoring existing code across a breadth of products used both internally and externally at the company. This long-term temporary employment opportunity is based in the Arlington, Virginia area.

Your responsibilities in this role

- If you can maintain and develop new features to internal and external facing software to enhance the customer experience and resolve issues on various operating systems, this job might be for you
- Assist with Scrum team to display right work estimates
- Frequently complete code-review and join forces with other developers
- Give clear and consistent message around solutions and time estimate to client-facing program management teams
- Sort out and grant production support

Requirements

- Less than one year of experience is acceptable
- You might be a good fit for this position if you have experience with software development life cycles, e.g. Agile, Big Bang, Spiral, Waterfall, etc.
- This position requires experience with at least one framework/library, e.g. Vue.js, Polymer, Angular.js, React.js, Ractive.js, Knockout.js, Ember.js, Bootstrap, etc.
- Knowledge of Django
- Solid understanding of Python
- You'll be a good fit for this position if you have knowledge of education standards such as QTI/APIP, SIF, AIF
- This position requires familiarity with scrum
- Ability to write clean, standardized code that performs optimally in highly concurrent environments
- You'll be a good fit for this position if you have familiarity with full-stack development (front-end, to middle/application tier, to database)
- Experience integrating with API backends
