Software Developer

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: \$66.50 to \$77.00 hourly
Employment status: Temporary

Description

There is a job opportunity in the Reston, Virginia area seeking talented and professional long-term temporary candidates for their Software Developer position. Apply today if you want to be responsible for implementing new features, maintaining existing code, and refactoring existing code across a breadth of products used both internally and externally at the company. It is preferred for applicants to have a growth mindset and the ability to work both independently and with a team.

What you get to do every single day

- We need a candidate who can maintain and develop new features to internal and external facing software to enhance the customer experience and resolve issues on various operating systems
- Customarily implement code-review and join with other developers
- Diagnose and contribute production support
- Join up with Scrum team to ensure factual work estimates
- Supply clear and consistent contact around solutions and time estimate to client-facing program management teams

Requirements

- Less than one year of experience
- Knowledge of education standards such as QTI/APIP, SIF, AIF, is required for success at this position
- Prior experience integrating with API backends
- You'll be a good fit for this position if you have experience with software development life cycles, e.g. Agile, Big Bang, Spiral, Waterfall, etc.
- Experience with at least one framework/library, e.g. Vue.js, Polymer, Angular.js, React.js, Ractive.js, Knockout.js, Ember.js, Bootstrap, etc., are strongly preferred.
- You'll be a good fit for this position if you have familiarity with full-stack development (front-end, to middle/application tier, to database)
- We are particularly looking for candidates who can write clean, standardized code that performs optimally in highly concurrent environments
- .NET experience required
- Solid understanding of Microsoft SQL Server
- We are particularly looking for candidates with familiarity with scrum
