

Software Engineer (Remote Position)

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: \$42.75 to \$49.50 hourly
Employment status: Contract / Temporary

Description

We are offering a short term contract employment opportunity for a Software Engineer in Austin, Texas. This role entails working closely with various technologies and systems, including Apache Struts, C++, Databases, EO/IR systems, and Hibernate ORM. The successful candidate will be tasked with the development, testing, and maintenance of software applications, utilizing their skills in AB Testing, Ajax, and API development.

Responsibilities:

- Design, develop, and implement software applications using Ruby on Rails, C++, and other programming languages.
- Work extensively with APIs, SDKs, and libraries, ensuring their seamless integration within the system.
- Apply defensive programming techniques to enhance the security and reliability of the software.
- Utilize knowledge of algorithms, design patterns, and programming best practices to optimize the performance of the software.
- Collaborate with the software engineering team to perform A/B testing, identify potential improvements, and implement necessary changes.
- Maintain up-to-date knowledge of EO/IR systems and apply this knowledge in the development process.
- Utilize Hibernate ORM for mapping an object-oriented domain model to a relational database.
- Develop and manage databases to ensure the secure and effective storage of data.
- Work with Apache Struts as a framework for creating enterprise-ready Java web applications.
- Use Ajax for creating asynchronous web applications, enhancing the user experience by increasing the web page's interactivity, speed, and usability.
- Develop API specifications and ensure their correct implementation in the software.

Requirements

- Proficiency in Apache Struts, C++, Database, EO/IR systems, Hibernate ORM, AB Testing, Ajax, API Development, ASP.NET, CSS, Ruby on Rails, API specifications, and API - Application Programming Interface
- Experience in software engineering and development
- Ability to design, code, test, debug and document software according to the functional requirements
- Knowledge in developing, implementing and maintaining high-quality software systems, using Java and web technologies
- Demonstrated experience with software development methodologies
- Strong problem-solving skills with the ability to work independently as well as in a team
- Excellent communication skills, both written and verbal
- A degree in computer science, software engineering, or a related field, or equivalent work experience
- Familiarity with Agile development methodologies
- Experience with version control systems like Git or SVN
- A solid understanding of web application development processes, from the layout/user interface to relational database structures.
