

Senior UI Developer

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: \$130000.00 to \$170000.00 yearly
Employment status: Permanent

Description

There is a permanent opportunity in the Arlington, Virginia area for a Software Developer—apply today if you are talented and professional! You should apply today if you would feel comfortable with a role where you are responsible for implementing new features, maintaining existing code, and refactoring existing code across a breadth of products used both internally and externally at the company. This position will be the best fit for a candidate with a growth mindset and the ability to work both independently and with a team.

Your responsibilities in this role

- Do business with Scrum team to submit meticulous work estimates
- Continually conduct code-review and unite with other developers
- This job is for someone who can maintain and develop new features to internal and external facing software to enhance the customer experience and resolve issues on various operating systems
- Rectify and produce production support
- Render clear and consistent notifications around solutions and time estimate to client-facing program management teams

Requirements

- Less than one year of experience required
- This position requires experience with at least one framework/library, e.g. Vue.js, Polymer, Angular.js, React.js, Ractive.js, Knockout.js, Ember.js, Bootstrap, etc.
- Candidates with familiarity with full-stack development (front-end, to middle/application tier, to database) will be the best fit for this position
- Grafana experience highly desired
- Typescript experience preferred
- Deep understanding of JavaScript
- HTML5 experience desired
- Adeptness in Angular
- CSS experience
- Demonstrated knowledge of jquery
- General familiarity with Webpack
- Practical knowledge of Mocha
- This position requires experience with software development life cycles, e.g. Agile, Big Bang, Spiral, Waterfall, etc.
- You might be a good fit for this position if you are familiar with Scrum
- You might be a good fit for this position if you can write clean, standardized code that performs optimally in highly concurrent environments
- Prior work with API design
- Candidates who have knowledge of education standards such as QTI/APIP, SIF, AIF will be preferred
