55446

Plymouth, MN, 55446

Cloud Engineer

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: DOE
Employment status: Contract / Temporary

Description

You might be the Systems Engineer that Robert Half is seeking for a job opportunity with a local client! This position requires you to serve as a key contributor to the maintenance and optimization of the client's network and wireless infrastructure. Apply today and grow your professional career with this exciting new opportunity.

Your responsibilities in this role

- Participate in the design of information and operational support systems

- Grant 2nd and 3rd level support

- Conduct and keep an eye on all installed systems and infrastructure

- Maintain, configure, install, and test system management tools, operating systems, and application software

- Compose and sustain custom scripts to increase system efficiency and lower the human intervention time on any tasks

- Provide backup, redundancy strategies, and security

- Review and check application performance for potential bottlenecks, distinguish possible solutions, and do business with developers to execute those fixes

- Connect with vendors and other IT personnel for problem resolution

- In a proactive manner provide the highest levels of systems and infrastructure availability

Requirements

- This position requires a candidate with solid networking knowledge

- This position will be the best fit for a candidate with proven working experience in installing, configuring and troubleshooting various operating systems

- Solid scripting skills

- You might be a good fit for this position if you have experience with monitoring systems

- Foundational knowledge in proxy servers

- Knowledge of Kubernetes

- Comprehensive knowledge of Google Cloud Platform

- API gateways experience highly desired

- Strong familiarity with Google Kubernetes Engine

- 3+ years of relevant experience - Candidates with solid experience in the administration and performance tuning of application stacks will be the best fit for this position

- Applicants should have experience with virtualization and containerization

- Candidates who have experience with automation software will be the best fit for this position
