Description

Robert Half is currently looking for an experienced SQL Developer who can help in the creation of continued business in a healthcare environment. The ideal candidate will provide the intermediate technical skills necessary to design, develop, implement, debug, document, and support application systems and their related procedures.

Biggest emphasis on SQL, .net, and Front End UI web applications

Functions:

Performs complex analysis and debugging of problems when working on application systems.

Performs analysis, design and project planning.

Performs complex coding and testing of systems.

Responsible for verifying accuracy of solutions.

May act as a technical consultant to the user department personnel in evaluation of system problem. Meets with users to help determine their needs and suggests solutions.

Communicates with Information Services management on project status and system problem resolution.

Functions as a project team member, works on tasks according to the designated project team leader to assure a successful outcome for each project.

Responsible for the verification and validation of production schedules for assigned systems.

Trains and provides support to Information Systems personnel.

Assumes technical on-call responsibility for assigned production systems.

Tests and documents all program development, changes and enhancements. Completes a change control packet complete with before & after test results, sample reports, CRC form and operational procedures.

Appropriately adapts work and customer assistance methods to accommodate the unique physical, psychosocial, cultural, age-specific and other developmental needs of customers.

Requirements

SQL, .NET, UI, Front-End Frameworks
