Robert Half®
is now hiring!

94404
Foster City, CA, 94404

UI Developer

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: DOE
Employment status: Contract / Temporary

Description

As a Front-End Developer you will be working on a wide variety of projects including landing pages, HTML email templates, custom themes, plugins and more. You will be working closely with cross-functional departments across the organization, including business stakeholders, product managers, software engineers, marketers, etc. You will be able to contribute to presentations and collaborate with cross-functional stakeholders to deliver work that is mobile-first, responsive and aligns with technical and accessibility standards. The front-end development teams have access to the software engineering and tech teams across the organization to stay on top of the latest technologies and trends.

Key responsibilities

- Complete other duties as assigned

- Provide assistance in recruiting and hiring of new Engineers

- Maintain confidentiality of client interfacing systems, documents, credentials, and components of statistical work

- Support internal documentation, training, and other special projects, as required

- Own technical leadership on client projects

- Clearly and effectively collaborate with internal and external clients

- Maintain and update existing applications

- Effectively work with cross-functional team members and teams

- Complete research and training on the job

- Observe and track the latest developments and direction of web-based platforms

- Bring about process improvements and development standards

- Provide mentorship to web engineers to help them develop their technical proficiencies

- Develop dynamic data-driven web experiences using various web-based APIs

- Implement proper design principles for projects and frameworks

- Design, develop, test, implement and support new front-end applications, systems, and tools, along with other developers

- Provide accurate estimates of features

Requirements

- Minimum 2 years' experience in architecting and delivering complex web-based applications

- Ability to communicate complex solutions to external clients, in a way that non-technical stakeholders would understand

- Skilled in multiple development methodologies

- Bachelors degree in Computer Science or relevant work experience

- Minimum 5 years' experience working as a developer writing code

- Minimum 3 years' experience working with common web frameworks
