Description

Robert Half is looking for a UI developer with experience in Vue.JS. This is a fully remote contract/contract to hire role. This candidate will make sure that the pie-charts and the data are correctly displayed. Main tech stack required for this role is: HTML, CSS, JavaScript, ES6, Vue.JS, React/Angular (nice to have), Charting Libraries, Bootstrap. also experience with any Charting libraries would be preferred.

Please apply to the job post and leave a message for Suman Sandhu @ 408-325-6440

Requirements

Responsibilities:

·   Contribute high quality, production code for our products security, reliability, availability and scale

·   Determine the best implementation that will meet the design of the Systems Solution Architect

·   Work with Vue.js to design, develop and debug Web applications

·   Perform requirements analysis, high-level design, effort estimation for new business requirements and feature enhancements

·   Participate in design discussions with business users, Solution System Architect and engineering teams

·   Work closely with QA engineers, technical leads and business users

·   Solve technical problems and handle performance/scalability issues on a day to day basis

·   Integrate back-end services with Vue.js based front end needs

·   Work with the team to manage, optimize and customize multiple web applications

·   Create and maintain technical documentation

Technical Requirements:

·   3+ years of experience in building database-driven applications and Web sites

·   Proficiency with front-end scripting including: HTML, DHTML, JavaScript, CSS, AJAX

·   Understanding and demonstrated adaptation of cross-platform, cross-browser compatibility concerns

·   Experience in any SPA Engine (Vue.js / React / Angular) development frameworks is required.

·   Experience with any of the charting library (D3, AMCharts, Fusion Charts) is added advantage.
