**Salary range:** DOE

**Employment status:** Contract / Temporary

### Description

Do you combine strong coding skills and a deep understanding of enterprise systems with creativity? We are looking for a highly motivated Full Stack Software Engineer with strong software engineering techniques and knowledge of design patterns. As a Full Stack Software Engineer, you will be expected to utilize best practices and innovation that results in superior software solutions. Ideal candidates will be self-driven, creative problem solvers and eager to collaborate and solve complex problems both on their own and within project teams.

How you will make an impact

- Assess new technologies and develop prototypes for steady improvements
- Work with an agile team to understand business needs and work through complex business processes to create solutions that align with the company goals
- Uphold top programming practices and standards
- Invite solutions which account for scalability and optimize performance
- Design and implement back end and front end components and services
- Produce high quality production-ready code in an agile environment

### Requirements

- Knowledge of common development frameworks
- Strong understanding of project methodologies
- Relational Database Management Systems experience
- 2+ years of experience with current development tools/languages
- Comfortable with creating and consuming WebAPI's
