

Sr. Data Engineer - RedShift & Python

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: DOE

Employment status: Contract / Temporary to Hire

Description

Robert Half is looking for a Sr. Data Engineer - Redshift & Python to be part of our client's growing team. We need Sr. Data Engineer with at least 7 years of full-time professional development experience to join our Data & Analytics team.

You will leverage cloud-based infrastructure to implement technology solutions that are scalable, resilient, and efficient. You possess a strong interest in synthesizing complex problems and transforming data to create solutions that add value to a myriad of business requirements.

If interested, please apply to the job post and leave a message for Suman Sandhu @ 408-325-6440

Requirements

Responsibilities:

- Architect, design, implement and operate data engineering solutions, using Agile methodology, that empower users to make informed business decisions.
- Send and retrieve data with external vendors and organizations (including API code integrations)
- Collaborate with Data Analysts, Data Scientists, DBAs, cross-functional teams, and business
- Facilitate and take ownership of assigned technical projects in a fast-paced environment.
- Continuously improve quality, security, efficiency, and scalability of data pipelines.

Skills/Experience Preferred:

- Expertise working with SQL queries, including performance tuning, utilizing indexes, and materialized views to improve query performance.
- Self-motivated, self-directed, and possesses hands-on experience with all aspects of the software development lifecycle, from design to deployment.
- Deep understanding of the full life data lifecycle and the role that high-quality data plays across applications, machine learning, business analytics, and reporting.
- Deep understanding of writing test cases to ensure data quality, reliability, and a high level of confidence.
- Track record of advancing new technologies to improve data quality and reliability.
- Financial services industry experience is a plus.
