

Front-End Software Engineer - ReactJS

Benefits: Candidates on temporary assignment may qualify for our competitive benefits package which includes group health, life and disability insurance and voluntary benefits such as retirement savings and holiday pay.

Salary range: DOE

Employment status: Contract / Temporary

Description

Robert Half has an opening for a Front-End Software Engineer - ReactJS. This position is a remote position with a preference for East Coast-based candidates. The primary responsibility is the development of client-side logic for our client's SaaS platform written in React.js, with a Golang/Python back end.

This is a fully remote, 3-6 months contract to hire role.

If interested, please apply to the job post.

Requirements

Responsibilities

- Development and maintenance of front-end software written in React.js
- Design and development of new data visualization capabilities using various JS libraries
- Design and development of UI/UX concepts and prototypes
- Implementation of security and data protection functions in the front end
- Building reusable components and front-end libraries for future use

Requirements

- A minimum of 5+ years of hands-on front end software development experience
- Proficiency with modern web technologies
- At least 3 years of experience with React.js
- Expert knowledge of JS-based data visualization frameworks
- Demonstrated UI/UX and visualization skills including familiarity for UI/UX design and prototyping platforms such as Figma and InVision
- Good grasp on core web concepts such as responsive design and mobile-first design
- Solid development practices with attention to documentation, detail, design, and quality
- A desire to learn new technologies and concepts
- Communication, writing and organizational skills
- Experience working in an agile team
